

Tomahawk Live Trap[®]

Manufacturing Traps & Cages Since 1925

Tomahawk Deluxe Thumb Set Trap

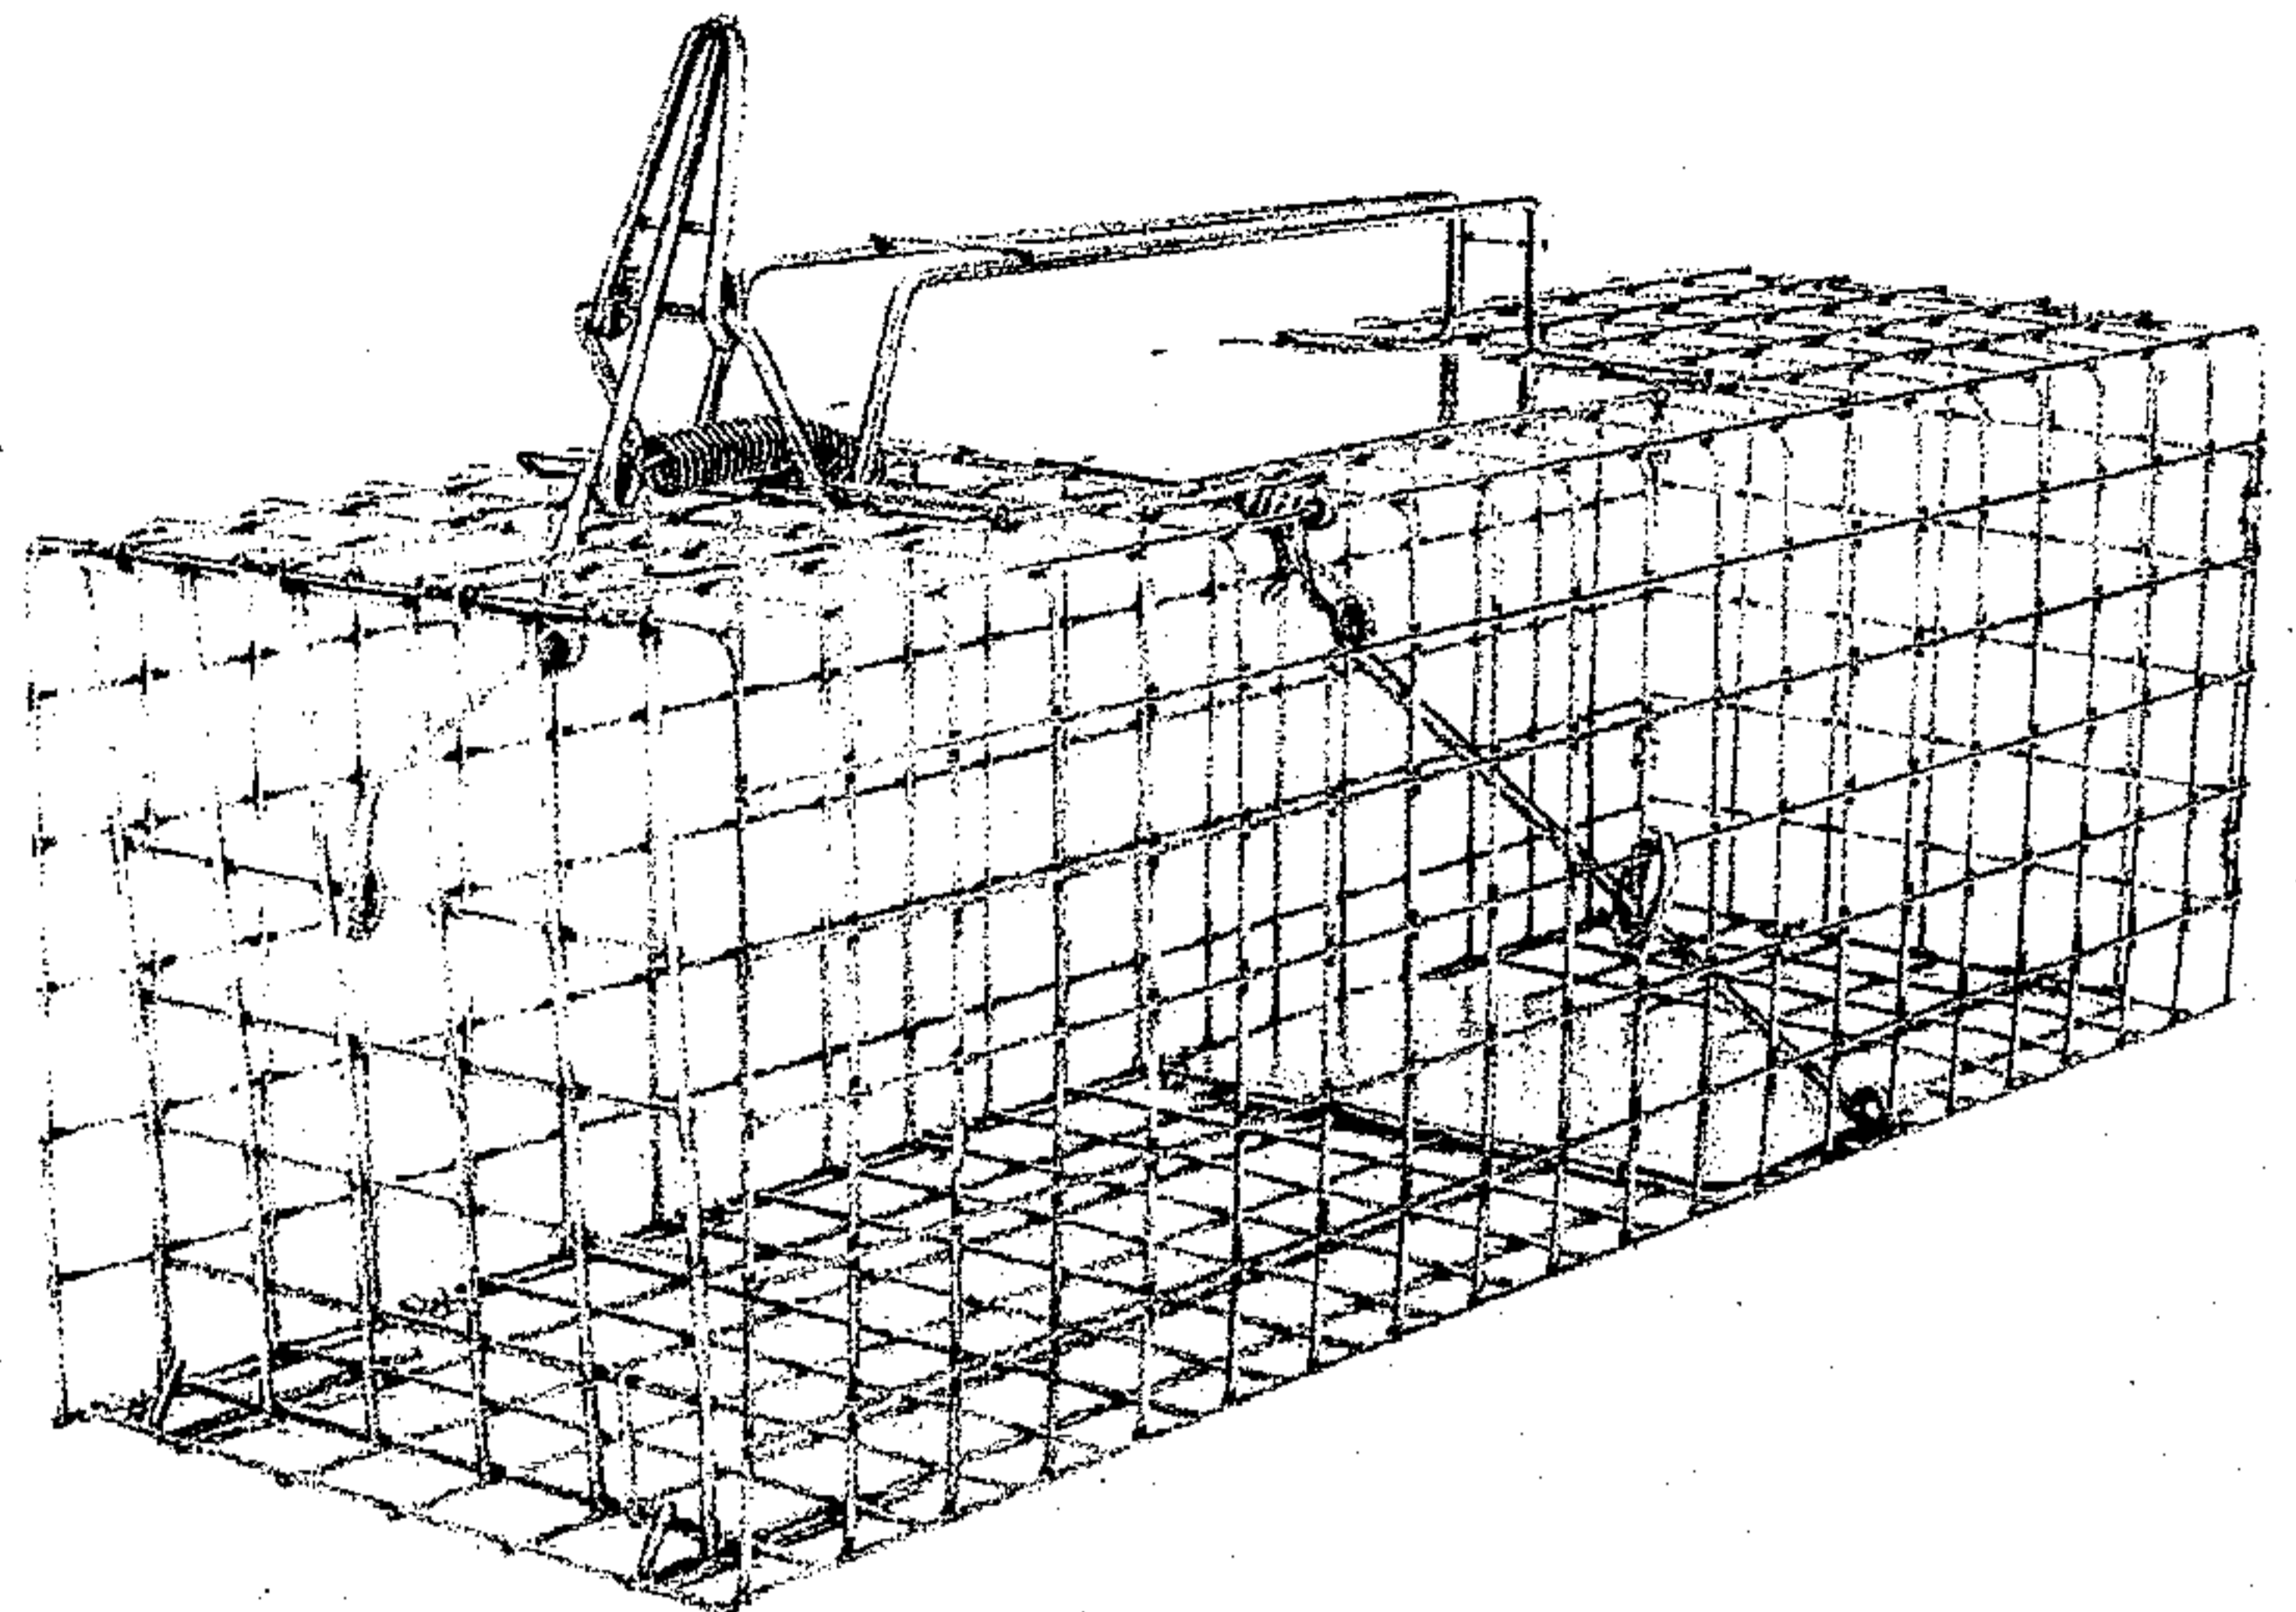

No Assembly Required. One Hand Operation. Easy to set and release.

Ideal for Catching: Squirrels, Chipmunks, Rats, Rabbits, Cats, Opossums, & Skunks.

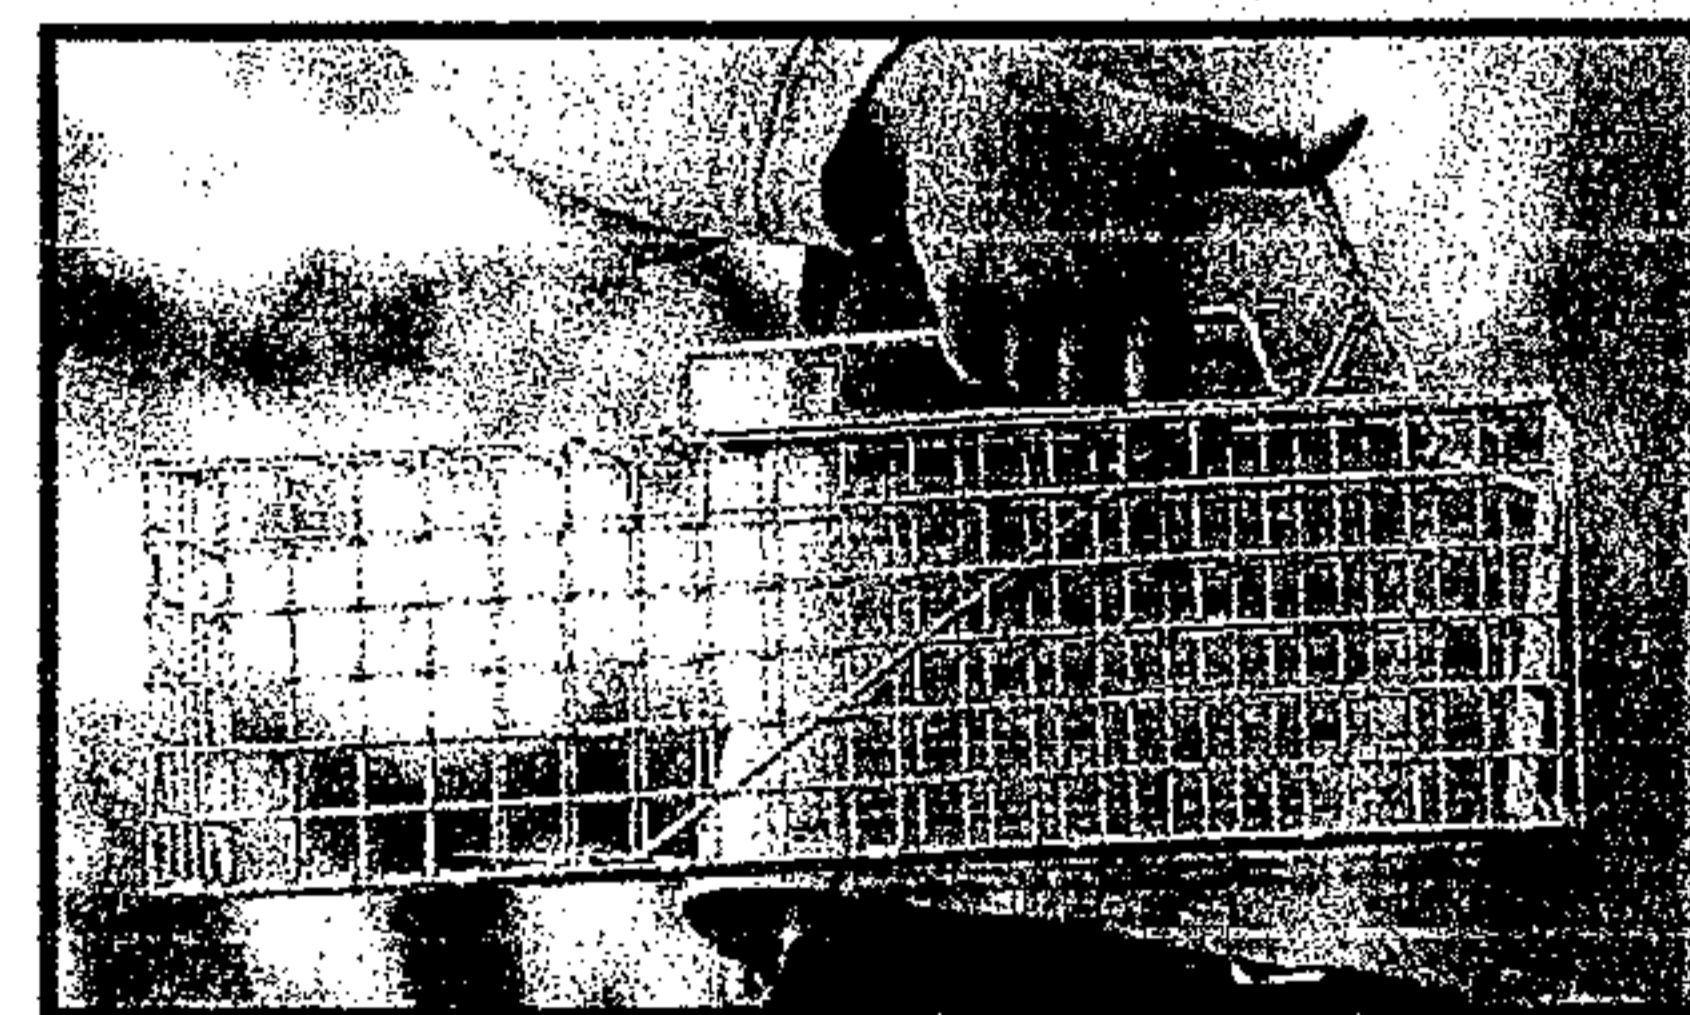

Front Door Design Allows Trap to be Placed Flush Against a Hole in the Wall, or the Ground.

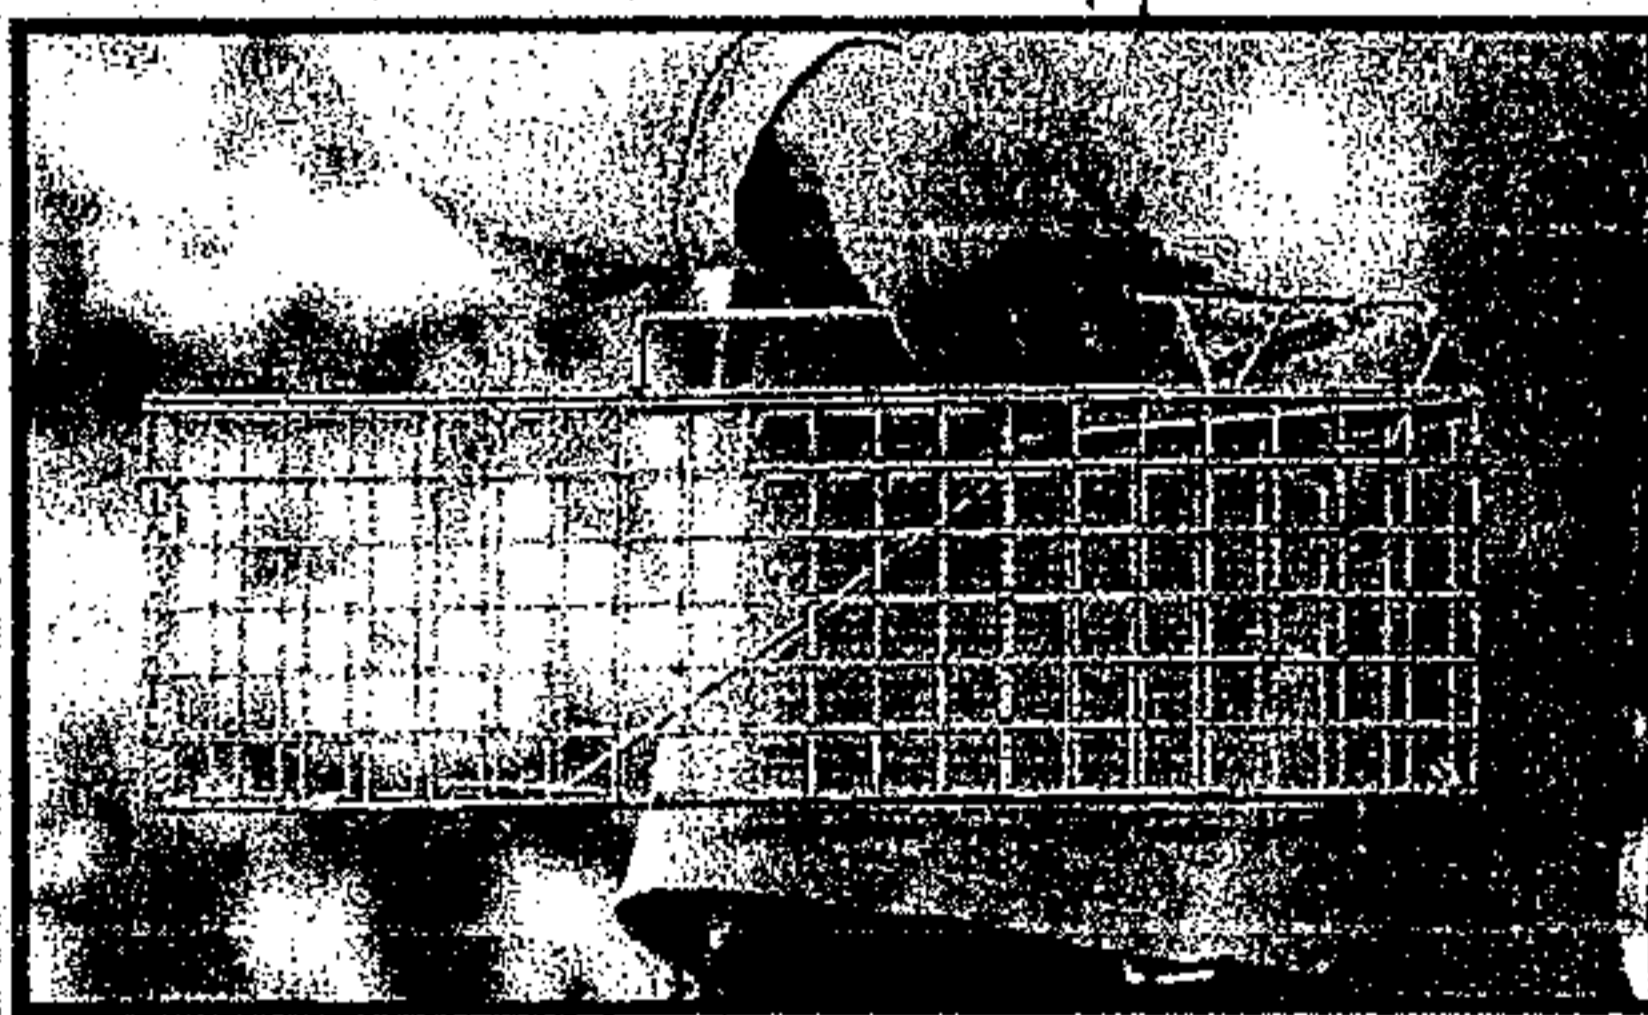

Tomahawk Deluxe Thumb Set Instructions

To set and bait your trap, follow the directions below. To release your animal, just push down on thumb lever, as pictured in step two below. The front door will rise, and the animal will run out the front of the trap.

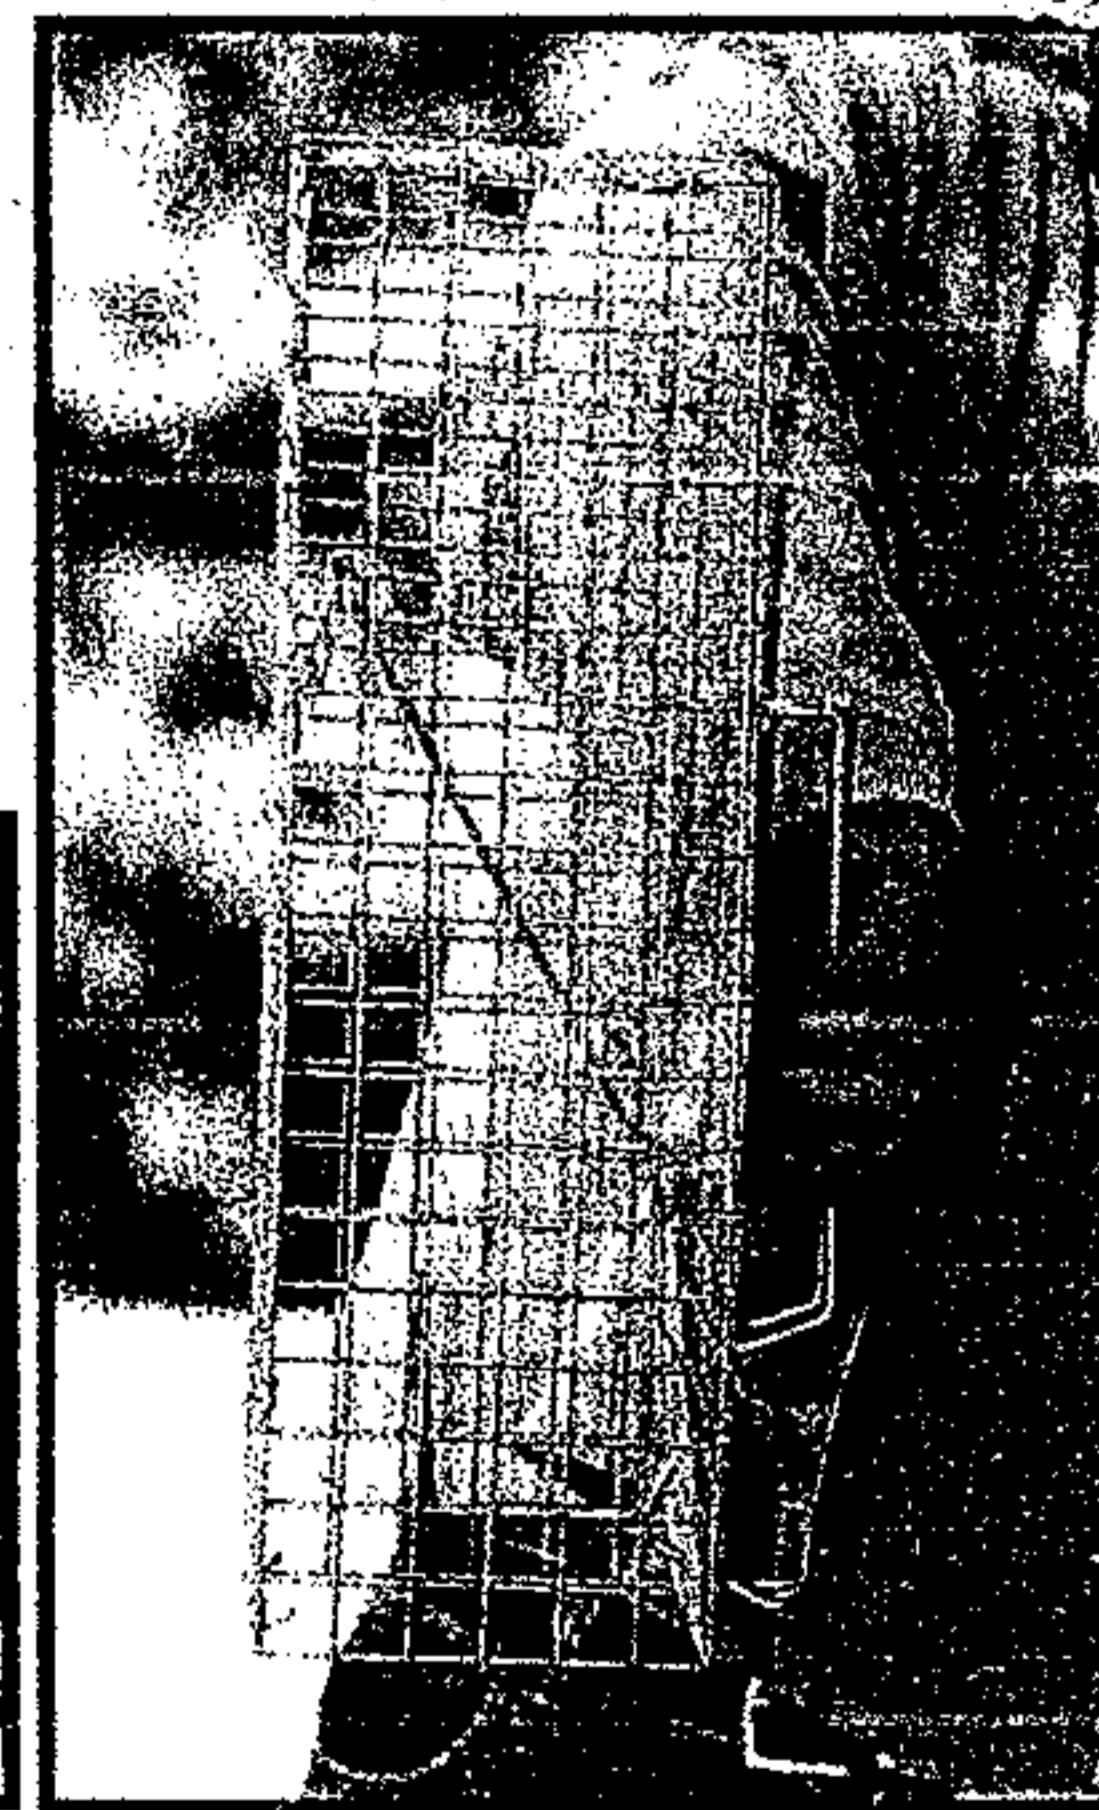

Step 1

Pick up trap by grabbing the handle located on the top of the trap. While holding onto handle, push thumb lever completely down. This causes the door to move backward and upward, inside the trap. Maintain pressure until the door completely rises to the top, inside of trap.

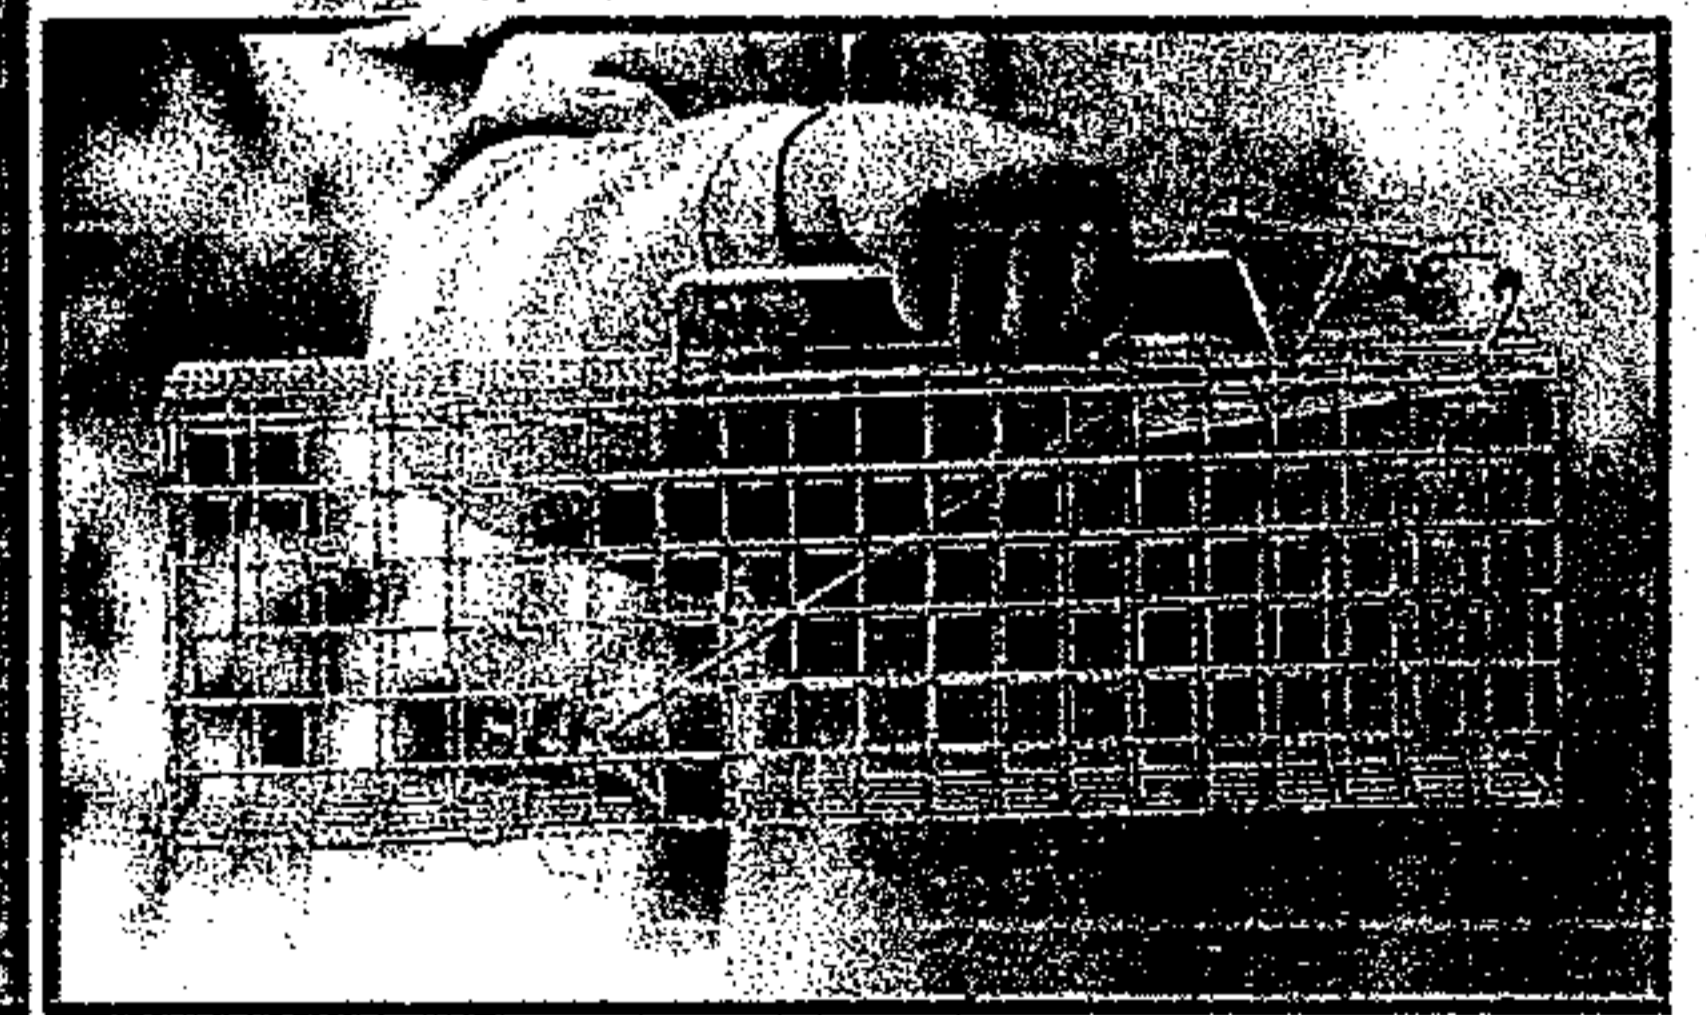

Step 2

Step 3

Keep pressure on thumb lever, and turn front end of trap downward, towards the ground. With the trap in this position, slowly release the thumb lever and carefully return trap to original position. This causes the trigger to move forward and hook the door. The trap door and the trip pan should stay up. Remember to place bait at the back of the trap.
